ULTRA UV PROTECTIVE CREAM

OUR STORY

After extensive research and thorough testing from natural and pure ingredients that scientists found in the plant and herbal ecosystem, we understand the wonderful benefits of these rare ingredients, with the ability to regenerate the new skin cell and provide healing to the one that is damaged.

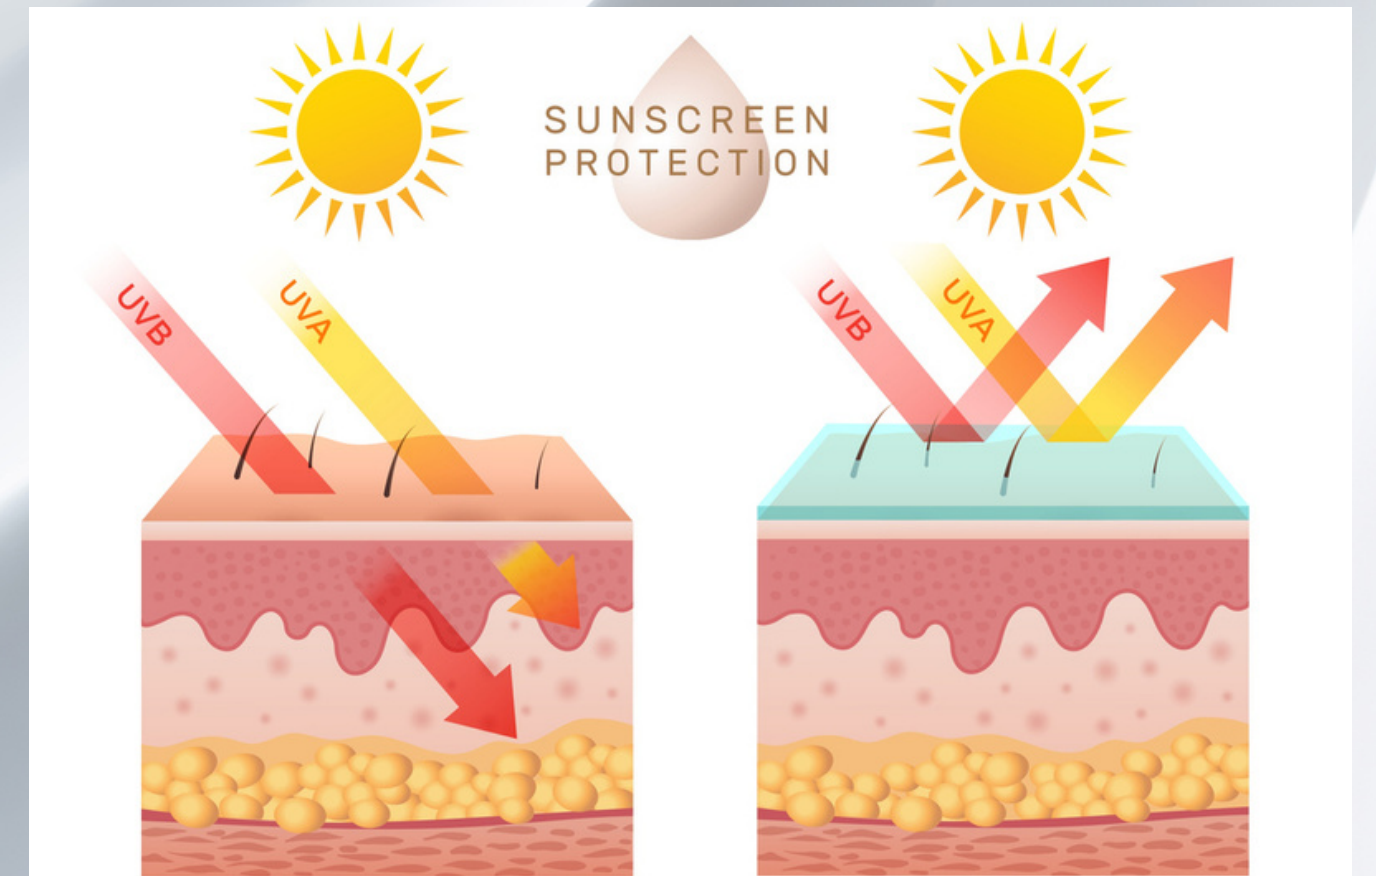

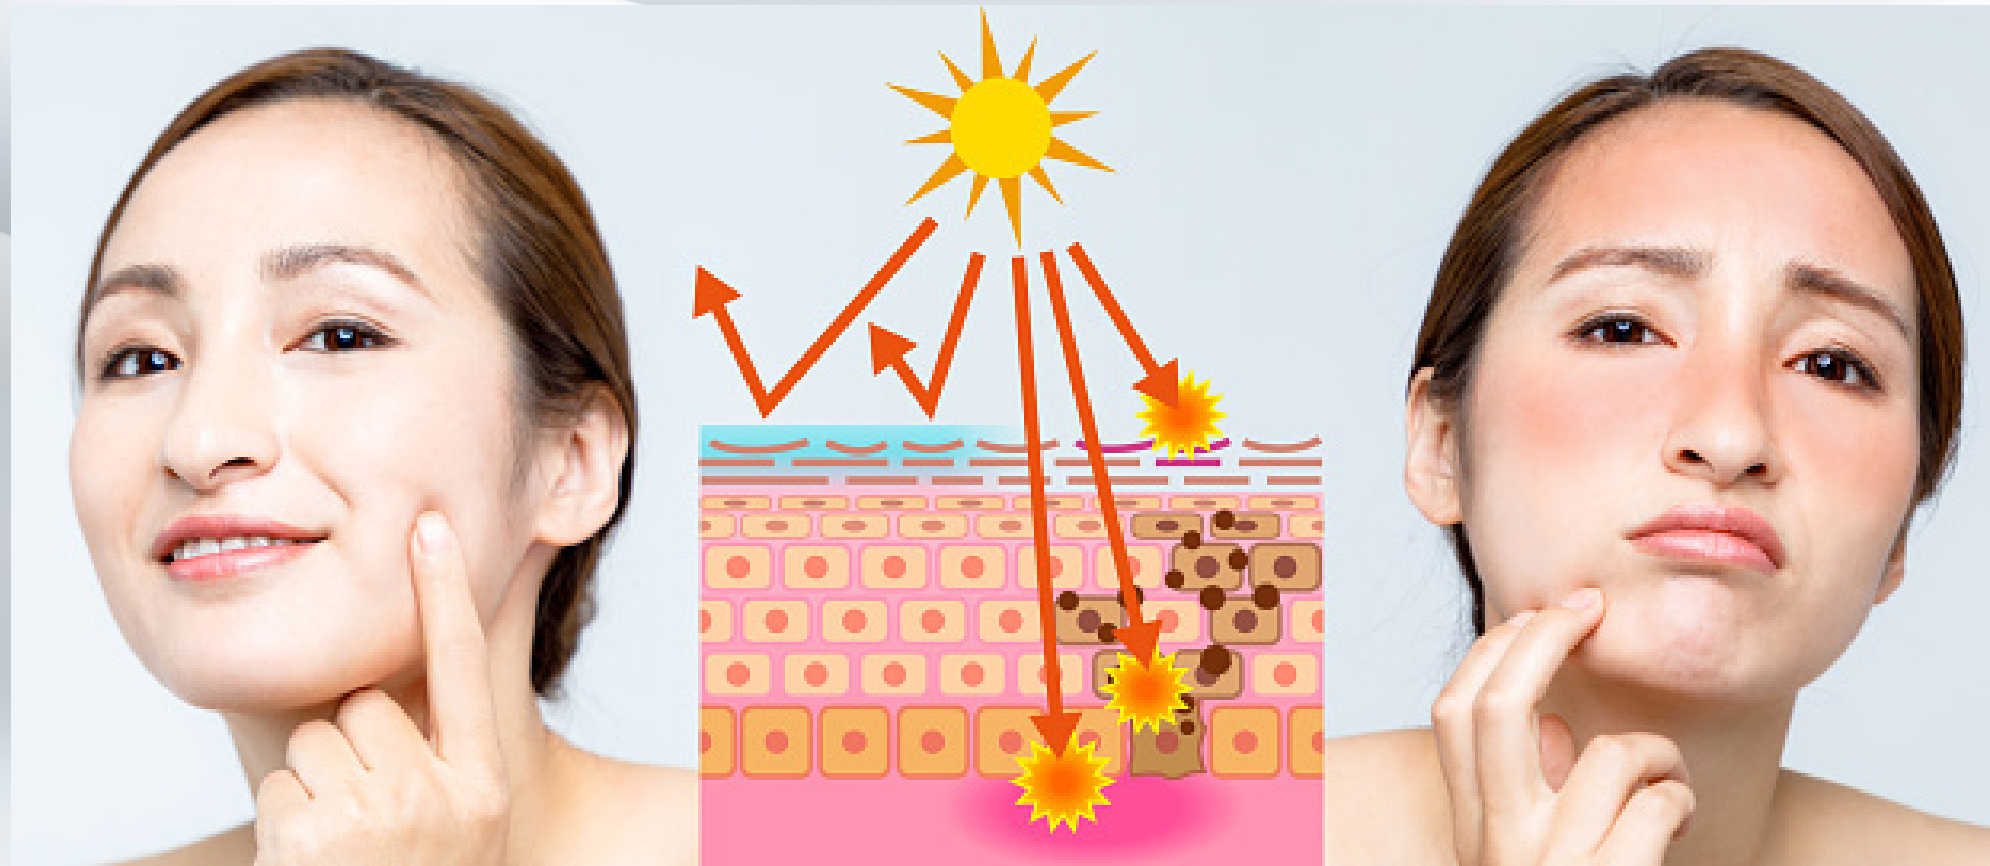

Dedicated to this product, our skin care experts with years of research experience extract and combine the right natural ingredients using the most advanced and scientific technologies in the United States.

Through formulating, rigorous testing, manufacturing with sterile process, and trial, HBU Bio-Skin care set is finally here. Our passion and purpose are to revitalize, rejuvenate and preserve the beauty of your skin.

WHY SUNSCREEN

In the process of skin care regimen, many skin care experts advise that sunscreen should be the number one priority to prevent premature aging and optimize the skin health.

Let's protect your skin from the harmful UV and infrared rays.

WHAT IT IS

Our innovative anti-aging sunscreen is designed to let you enjoy the sun worry-free by offering ultimate protection. The formula contains a high SPF with broad spectrum protection and prevents damage in skin DNA structure caused by harmful UVA and infrared rays. It is also infused with antioxidants and anti-aging ingredients for skin nourishment from deep inside.

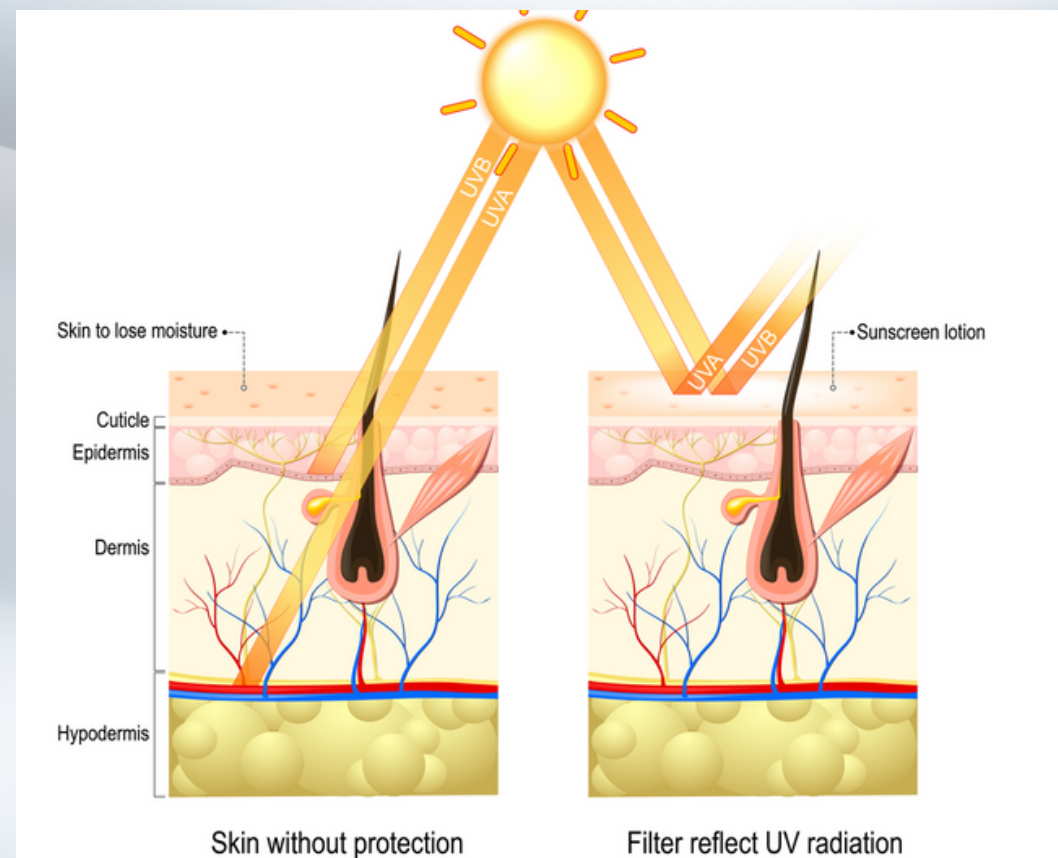

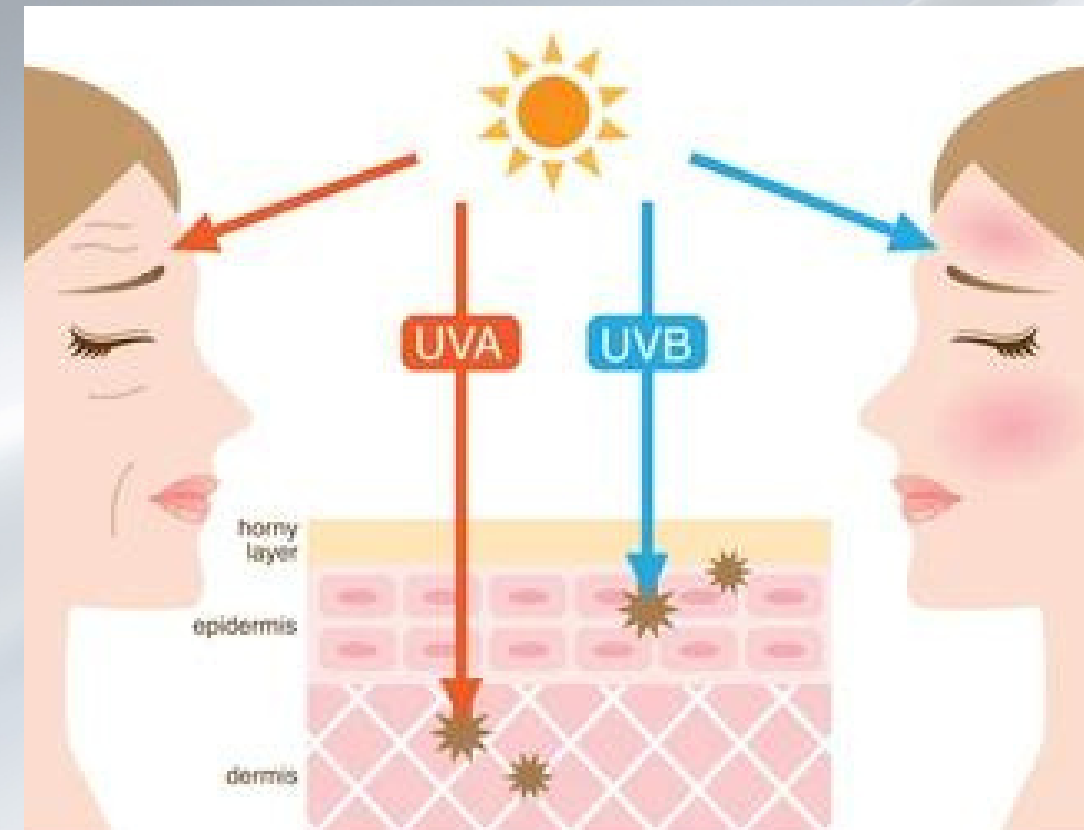

Sunscreen also helps protect important components of the skin such as collagen, keratin, elastin, helping the content of these substances not to be reduced, thereby helping to keep the skin smooth and healthy.

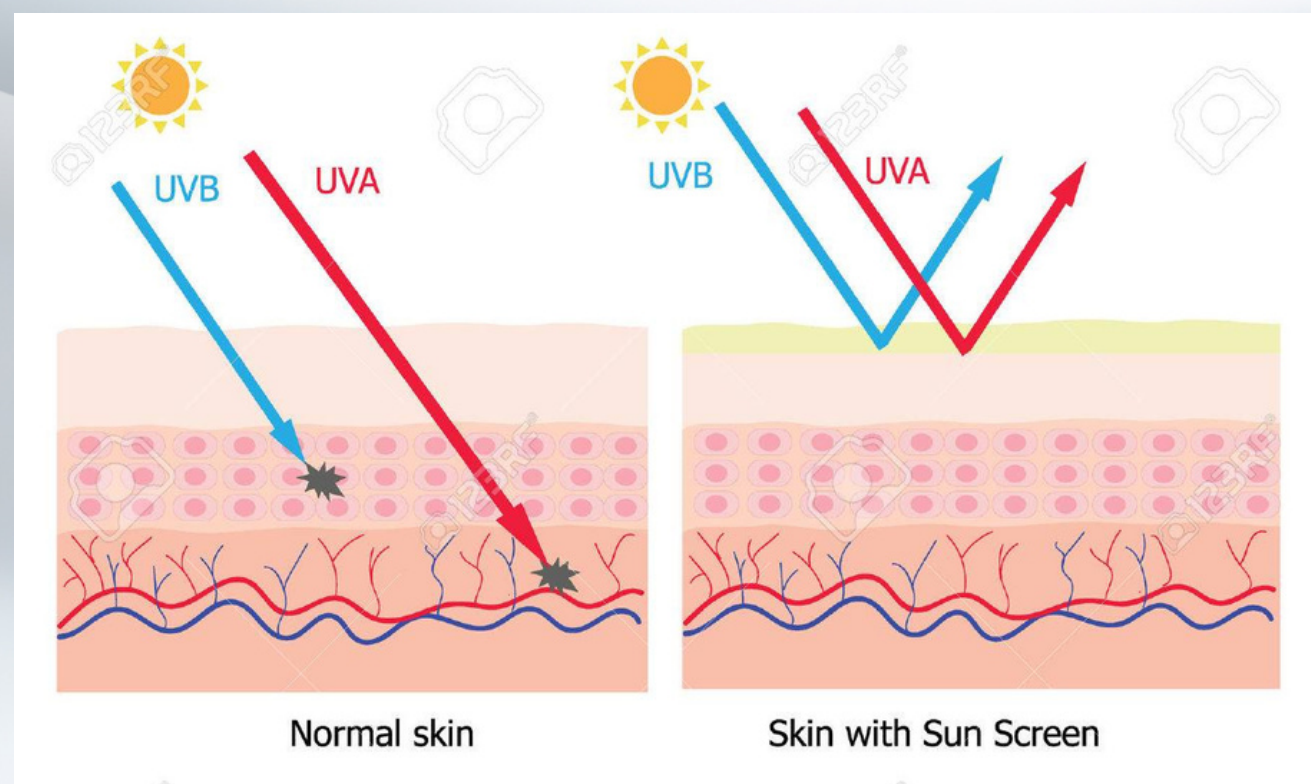

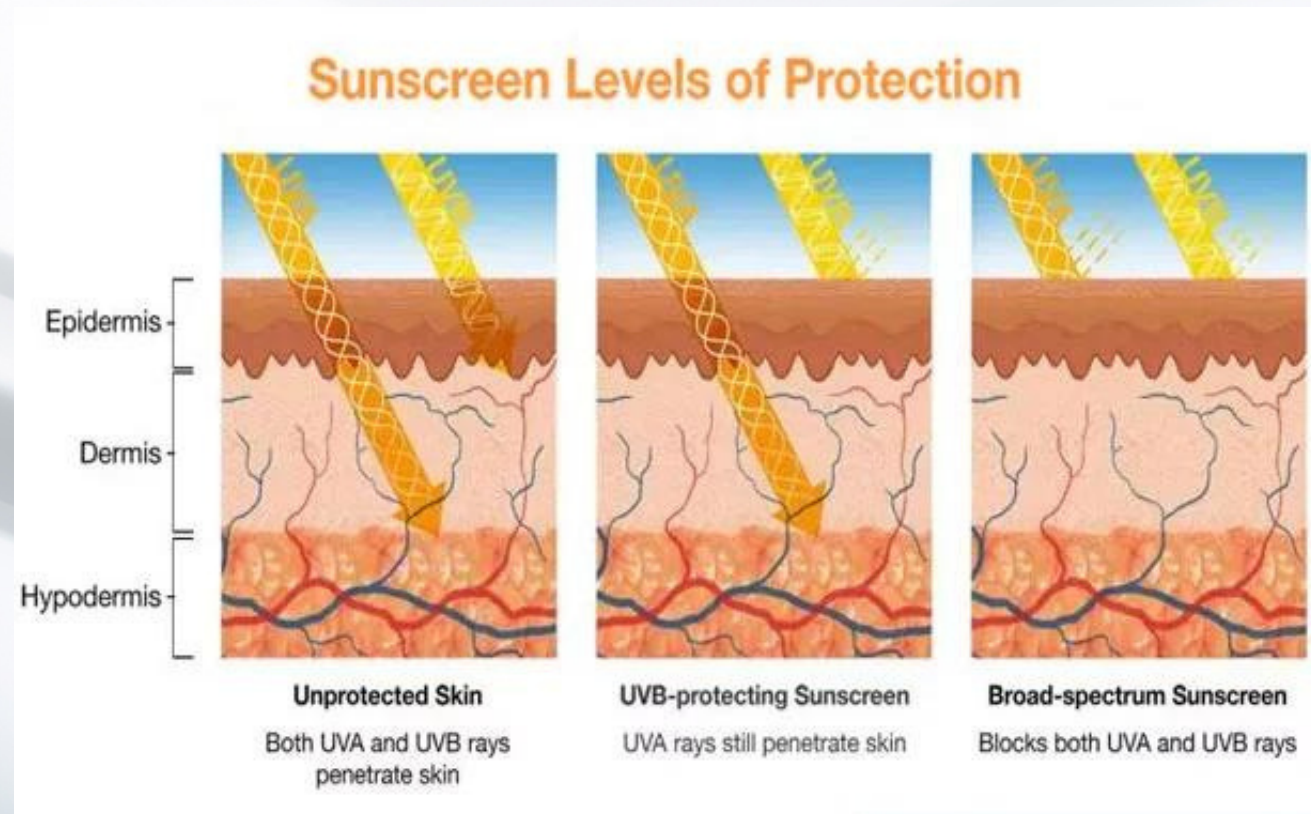

WHAT IT DOES

This high-protection sunscreen contains Zinc Oxide and Octinoxate as the active ingredients to prevent sunburn and premature aging from sun exposure. Our sunscreen is designed to sit seamlessly under your makeup with no residue or white cast.

- The combination of vitamin C and E offers double protection.
- Prevent hyperpigmentation and dark spots, and help brightening your skin.

- Prevent UV radiation exposure or any harmful environmental pollutant.
- Promote skin health.
- Reduce the risk of skin cancer

- Designed to be worn alone or under your makeup as a protective base.
- Moisturises your skin for all-day hydration to improve skin's suppleness and elasticity.
- With the newest sunscreen formula, our Ultra UV Protective Cream forms a two-way locking effect on the skin: The cream locks in from deep inside the moisture and whatever skin products you apply. At the same time, it blocks the skin from air pollution, UV rays, or any harmful environmental effects. It is the ultimate skin protection with double effect giving you beautiful and young-looking skin.

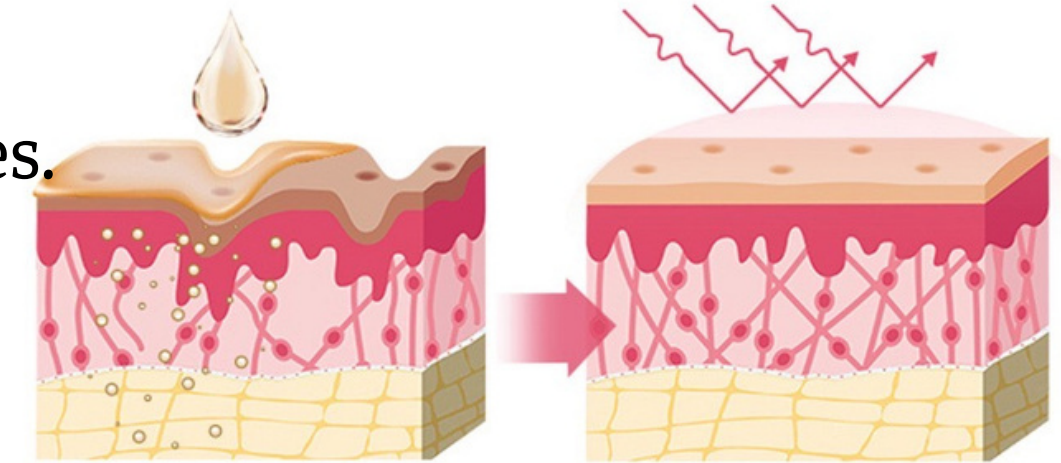

OUR TECHNOLOGY

Ultra-Protective Sunscreen is a highly researched product, formulated exclusively by the leading Dermatologists in the United States.

This product is manufactured using modern technology with sterile techniques. The manufacture process meets GMP standards and is strictly regulated by the leading US certification agencies.

Ultra-Protective Sunscreen is produced by biotechnology with high absorbency level to deep skin cells, working from the inside out to effectively nourish and protect the skin layers from the harmful UV and infrared rays.

Strong Penetration Capacity

Small molecules has strong penetration ability that can be deeply penetrated into the skin and effectively Repair skin

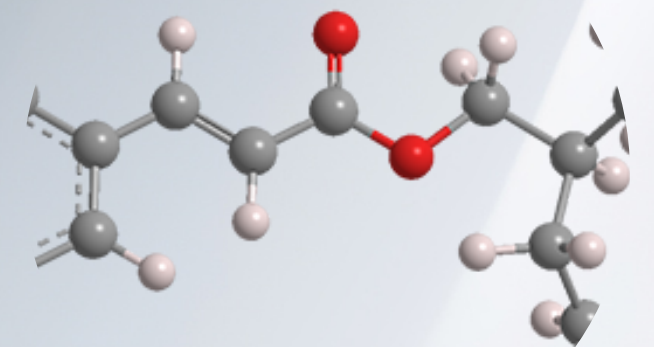

ACTIVE INGREDIENTS

Zinc oxide and Octinoxate

It's a scientific formula to combine these two effective ingredients that block and filter the sun's harmful rays. At the same time, it deflects the sun so that the UV ray will not absorb and damage the skin layers.

Besides these two ingredients. Our Ultra Protective Sunscreen is combined with certified organic natural plant extracts that have ultimate skin benefits. It's all in one product, protecting the skin from the sun, yet it nourishes the skin from deep inside. It is a powerful anti-aging solution for you.

OTHER KEY INGREDIENTS

Safflower Seed Oil

Boosts your skin's moisture levels to support its natural protective barrier to prevent free radical damage.

Thyme Leaf Extract

Heals damaged skin as an anti-inflammatory and antioxidant ingredient, leaving behind a youthful glow.

Centella Asiatica

Boosts your skin's collagen production and improves cellular turnover to even out your skin tone and complexion.

OTHER KEY INGREDIENTS

Vitamin E

Locks in your skin's moisture and strengthens the skin's protective barrier to prevent UV-related damage.

Vitamin C

Promotes collagen production and works to visibly brighten your complexion to reduce the appearance of aging.

Rosa Canina

Deeply hydrates the skin by locking in moisture to support your natural protective barrier to prevent oxidative stress.
